**12 Stall Horse Barn and Attached Arena**

This horse barn and arena is the 2010 winner of the Canadian Farm Builders Association award for horse facility projects.

Project included all site preparation, new water well, manure storage as per Nutrient Management Plan, renovations to existing barn on farm site, entrance system and security system.

Stable Barn:

- 12 custom stalls, rubber floors and powder coated hardware.
- Hay and bedding storage, wash stalls, blanket room, canopies at entrance doors, custom cupola design and unique exterior column detailing.
- Viewing room with raised floor, ceramic

tile, custom cabinets and trims, wainscot trimming, washroom, storage and custom lighting fixtures.

- Engineered geothermal heating and ventilation systems, water softener and filters.

Riding Arena:

- Pole frame construction
- 80' x 208' with interior sloped kickboard
- 8' x 6' vent panels
- Tapered endwall and sidewall
- Clear light panels
- Bird screen
- Scissor truss
- Insulated at the roof line
- Induction lighting
- Ridge vents
