Product Information: Prefinished Sheet Steel

- A - Versatility**
- B - Durability**
- C - Colours**
- D - Economy**

B - Durability

Prefinished sheet steel coating systems have been developed over the past 30 years to meet a wide variety of environmental conditions. Prefinished sheet steel has been successfully used in a variety of building applications, from agricultural structures on the prairies, to light and heavy industrial building in urban centres, to the highly corrosive environments of pulp and paper industries and marine locations.

Architectural selection of prefinished sheet steel is not limited by environmental conditions. Combining a variety of substrate and coating systems with a broad range of colour, the structure can be shaped to suit the imagination:

For more information on the durability of prefinished sheet steel, contact the Canadian Sheet Steel Building Institute (C.S.S.B.I.) or your local C.S.S.B.I. member.
