Product Information: Prefinished Sheet Steel

- A - Versatility**
- B - Durability**
- C - Colours**
- D - Economy**

A - Versatility

For the designer, profiles fabricated from prefinished sheet steel are available in a wide range of colours, shapes and thicknesses. With a variety of profiles from shallow corrugated to complex shapes, standing seams, hidden fastener, curved, foam filled or flat faced profiles, prefinished sheet steel can be shaped to meet the load requirements of your project and the needs of the designer.

Profiles produced from prefinished sheet steel have found application in Institutional, Commercial, and Industrial projects. From the high arctic to the deep south, architectural expression can be seen in domed, curved, angled and flat surfaces.

Selection of colour and profile can be creatively used to harmoniously link exterior and interior surfaces of the structure.

For more information on the versatility of prefinished sheet steel, contact the Canadian Sheet Steel Building Institute (C.S.S.B.I.) or your local C.S.S.B.I. member.
